

Robust under the Gust

The book *Robust under the Gust* published by our Department depicts the moving stories of brave children with catastrophic diseases. It is not only a book to record the life journeys of our fighters under the threat of serious illnesses and the unconditional love shown in these battles, but also the positive attitude towards and determination against adversity. We do hope that the stories can encourage and urge you to treasure the beauty of life, and most important of all, not to give up easily as life is but once. Unlike the first limited edition of this book in 2004, the second edition published in November 2007 is for open sale, aiming to better promote the book and its spirit so conveyed in the stories.

The income and donations generated will be put under the Robust under the Gust Fund of The University of Hong Kong, which will finance the production and publicity of the book and other issues related to child health. More details can be found at website www.hku.hk/paed or call 2817 0641 for enquiry. Thank you for your support!
