WAS 2022, Munich, Germany – First Announcement

Dear researchers and clinicians,

Following the cancelation of WAS2020 due to the COVID19 pandemic, we are happy to announce that **The 3rd International WAS symposium will take place on Friday March 18th, 2022 in Munich, Germany.** This event will precede the EBMT2022 and will enable researchers and clinicians to meet, present and discuss their work in the area of WAS and WASp research. More details about the event are available at www.was2022.org

We are planning a series of sessions, keynote presentations and panel discussions. Our objectives for the symposium are simple, yet bold. We hope to attract researchers and clinicians from around the world to:

- Expand WAS/WASp research.
- Bridge the gap between basic and clinical research to speed up applications
- Foster collaboration among researchers.
- Motivate young researchers to focus on WAS/WASp

We invite you to participate at the symposium and be updated with the most recent knowledge regarding Wiskott Aldrich Syndrome. WAS2022 symposium Program can be found [here](#). Previous 2014 and 2016 meetings programs are available [here](#).

For additional information or any clarification needed, please send us E-mail at: office@was.org.il

Looking forward hearing from you and seeing you at the symposium.

WAS 2022 Organizing committee

Prof. Michael Albert, Prof. Adrian Thrasher, Prof. Bobby Gaspar, Prof. Anna Villa, Dr. Sumathi Iyengar, Mr. Amir Kedar.

The Wiskott Aldrich Syndrome Association (R.A)

The WAS2022 Symposium was made possible, in part, by a grant provided by the Jeffrey Modell Foundation WIN Program.

This Networking event has received funding from the European Union's Horizon 2020 research and innovation programme under the EJP RD COFUND-EJP N° 825575
